

These aren't my fabrics for this one, but I had these pics to help you with placement while sewing these little triangles on each side.

Now to make our star squares, here is our deconstructed block. We will use the MEDIUM 1 squares in the centres and the LIGHT squares at each of the four corners of this block. I have already sewn these into 3 strips.

Completed these should measure 6-1/2" now.

The last thing we need to do is grab the LIGHT rectangles and add them to this and make our star float in blank space. We will add the shorter (6-1/2") rectangles to each side, finishing with the larger (12-1/2") rectangles on the top and bottom.
